You manage to find a gas station in a small town where they can fix your car, but it's going to take a few hours. You ask the mechanic if there's any place to get something to eat, and he points across the road to Moe's Cafe, a real dump. You don't have much choice, so you head inside and take a seat at the first booth on the left. So begins Moe's Cafe, one of 48 innovative and intriguing prompts for student writing. These classroom-tested prompts put students in a place or in front of a character and ask them to describe what they see. The thinking, writing, and scribbling they do for the prompts inspires them to create their own stories and poems. After writing 90-word mini-stories, students read a short story or watch a film scene to help them expand on their own creative works. A section of longer readings models writing strategies. The lessons and activities reinforce and develop skills defined by the National Council of Teachers of English as appropriate for students in grades 6-12. Good Year. Joan's Junk Shop|x|Kick-start students' imaginations with these stimulating writing prompts. Speculative Pedagogies|x|Can you imagine future learning environments devoid of the systemic inequities that stifle student learning opportunities and teacher decision-making in most classrooms today? This volume offers the necessary steps—playful, participatory, historically informed—that are required to forge a pathway from the present U.S. educational landscape to a freer tomorrow. The authors use speculative approaches to teacher education and student learning to intentionally design beyond the boundaries of traditional research and practitioner resources that seek to “fix” current schooling conditions. Building from visionary organizing and artistic traditions that have captured the popular imagination, this volume suggests new forms of engagement for diverse learners. It pragmatically explores how to work toward radical new spaces of possibility for learning and teaching. Chapters include a range of learning contexts, from problem solving in complex video game settings to innovative world-building alongside young people in schools and communities. Readers will be inspired to completely rethink what is possible when it comes to justice-oriented, culturally responsive education. Book Features: A collection of over 40 contributors explore speculative education across a range of research settings. Examples of digital learning that include videogames and online collaboration. Multiple chapters that feature co-authored research and innovation with students and teachers. Innovative design and pedagogical strategies, including a chapter re-writing policy documents based on speculative imagination. Designing Effective Writing Prompts for English|x|Seminar paper from the year 2010 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1.7, Southern Illinois University Carbondale (Southern Illinois University at Carbondale - English Department), course: English Composition Pedagogy and Practice, language: English, abstract: A teacher has to create a work-friendly environment that engages students to

participate in and become a part of the classroom activities. Since I have had some teaching experience, I know that this is the most daunting task the teacher is confronted with. Furthermore, this is a task the teacher has to fulfill every day anew. No lesson is the same, and today your class can be totally different than the day before. Students' attitude and participation in the classroom can fall from astonishing to frustrating within moments. To be aware of the classroom vibe is most crucial to teaching success. Standing in front of the classroom, the teacher has to be able to adapt to the students' condition, to engage with them and to arouse their interest; in short, the teacher has to be aware of his or her audience. As a teacher, you need to be able to open a communicative channel that allows you to convey your message adequately and at the same time reach your students. Both speaker and recipient have to feel comfortable with the channel and must be interested to keep this channel open. When this communicative approach becomes one-sided, the teaching will fail; either the teacher will not be able to perform in a comfortable way, or the students might not be willing to receive. This can be avoided if both sides cooperate with each other by "make[ing] your conversational contribution such as is required, at the stage at which it occurs, by the accepted purpose or direction of the talk exchange in which you are engaged" (Grice 24). Grice talks about five maxims of conversation that need to be respected to provide a fertile ground for conversation.

Dream Writing Assignments Creative questions elicit creative responses. That's what English teacher David LeCount demonstrates in this collection of quirky, provocative writing prompts designed to release students from standardized writing assignments. More than 600 prompts serve as multidisciplinary opportunities for students to write creatively. Dream Writing Assignments can be used in two ways: as a practical, flexible, and handy resource for teachers who are looking for creative topics to assign, and as a stimulating student text. The prompts encourage students to research, reflect, and explore; engage in wordplay; and experience writing as a form of discovery and delight. Think of the results if you should invite your students to answer the following questions: How are violence and intelligence related? What is your idea of the perfect experience of beauty or happiness? If greed is an addiction, how can it be cured? More than a list of topics, Dream Writing Assignments includes student writing samples, plus principles and examples of masterpieces of Asian literature woven throughout the prompts. Haiku is a favorite of American teachers, and LeCount uses his expertise in this short verse form to offer some examples for the curious to try their hand or refresh their thinking. Use the prompts so students can discover their own voices. Shake them from their daily, routine minds and awaken them to a world where their imaginations can roam.

actively looking for anything that connects them with the changes happening in their lives, and the books discussed throughout *Literature for Young Adults* have the potential to make that connection and motivate them to read. It explores a great variety of works, genres, and formats, but it places special emphasis on contemporary works whose nontraditional themes, protagonists, and literary conventions make them well suited to young adult readers. It also looks at the ways in which contemporary readers access and share the works they're reading, and it shows teachers ways to incorporate nontraditional ways of accessing and sharing books throughout their literature programs. In addition to traditional genre chapters, *Literature for Young Adults* includes chapters on literary nonfiction; poetry, short stories, and drama; cover art, picture books, illustrated literature, and graphic novels; and film. It recognizes that, while films can be used to complement print literature, they are also a literacy format in their own right--and one that young adults are particularly familiar and comfortable with. The book's discussion of literary language--including traditional elements as well as metafictional terms--enables readers to share in a literary conversation with their students (and others) when communicating about books. It will help readers teach young adults the language they need to articulate their responses to the books they are reading.

This book contributes to the body of knowledge related to teacher assessment competence, and how it is manifested in the decisions they make about assessment procedures and instruments in their classes. Focused on specific challenges related to classroom assessment, each chapter reports on particular assessment issues faced by teachers, their choices regarding such issues, and the consequences (actual or anticipated) of their decision-making. This book will interest the thousands of teachers globally dealing with the numerous challenges associated with effective classroom assessment in language learning. Junior high school teacher Kristie Jolley believes students become more willing and motivated to practice reading strategies when they are “comfortable within their realm of literacy.” Background knowledge of video games helps students succeed in understanding and enjoying game-based texts, which she incorporates into her classroom library as encouragement for a habit of reading and as a bridge to increasingly difficult texts. Jolley also offers an overview of popular game-based texts.

. SLIS Connecting. SLIS. Reaching Out: A Publication Trend Analysis of Scholarly Articles Discussing Graphic Novels and Reluctant or Struggling Readers.

Graphic novels combine short text and pictures to tell a story or convey information while still engaging the reader visually. This is a potentially useful tool for reaching out to struggling and reluctant readers. Struggling readers have difficulty reading and understanding what it is they are reading. Pictures allow for more context clues than just text alone, allowing for the potential for greater success in comprehension for struggling readers. Reluctant readers, on the other hand, may have more of a distaste for reading. In some cases, they are capable of understanding what they read, but they do not enjoy the activity and tend to avoid it. Graphic novels allow for a more visual experience when reading and potentially grabbing and holding the reluctant readers' interest. The purpose of this study is to analyze the publication trends in library and information (LIS) journal articles as well as educational journal articles that discuss graphic novels and reluctant or struggling readers, specifically publication trend over time, authorship, core journals, and the number of articles that are based on surveys or interviews.

. TESL Canada Journal. TESL. A Case Study of the Revision Process of a Reluctant ESL Student Writer. This case study investigated the revision process of a reluctant ESL student writer. It focused on revisions made at the in-process stage and at the between draft stage of the writing process in which the student revised in response to written feedback. Two writing assignments were given, and the topics varied in their degree of familiarity to the participant. Some findings corroborated those of earlier studies: the participant made more surface-level revisions than those related to structure and content; he made more revisions and high-level revisions in response to written feedback than when working on his own. Although familiarity with the topic seemed to have no effect on the revision patterns of the student, the classroom teacher's focus on form in responding to and evaluating his writing was seen to affect his attitude toward revision and use of revision strategies.

The Most Famous Writer of the Low Countries: Herman Brusselmans Star Author and (Reluctant) Public Intellectual.

The Flemish writer Herman Brusselmans is the most famous author of the Low Countries. In this article, Herman Brusselmans is analysed as a star author. First and foremost, two striking aspects of Brusselmans's

stardom are analysed: his public visibility and the cult of the private. Attention is then focused on Brusselmans's experience of celebrity, which he - like many other star authors - thematises in his books. Doing so, he consciously places himself in the context of popular culture. On the other hand, as a result of his celebrity status he has been expected - particularly in the last few years - to assume the role of public intellectual willy-nilly, and this in turn has had consequences for his work.

To motivate struggling and reluctant readers, teachers must first learn about students and their abilities. This knowledge will allow teachers the opportunity to mold units of instruction and present students with texts framed in a manner that will connect their experiences with the material. This chapter provides strategies for engaging with students to learn more about their personalities and reading abilities. Also included are strategies for connecting complex texts with student interests for reluctant readers as well as instructional methods to assist struggling readers.
