You manage to find a gas station in a small town where they can fix your car, but it's going to take a few hours. You ask the mechanic if there's any place to get something to eat, and he points across the road to Moe's Cafe, a real dump. You don't have much choice, so you head inside and take a seat at the first booth on the left. So begins Moe's Cafe, one of 48 innovative and intriguing prompts for student writing. These classroom-tested prompts put students in a place or in front of a character and ask them to describe what they see. The thinking, writing, and scribbling they do for the prompts inspires them to create their own stories and poems. After writing 90-word mini-stories, students read a short story or watch a film scene to help them expand on their own creative works. A section of longer readings models writing strategies. The lessons and activities reinforce and develop skills defined by the National Council of Teachers of English as appropriate for students in grades 6-12. Good Year. Joan's Junk Shop|x|Kick-start students' imaginations with these stimulating writing prompts. Speculative Pedagogies|x|Can you imagine future learning environments devoid of the systemic inequities that stifle student learning opportunities and teacher decision-making in most classrooms today? This volume offers the necessary steps—playful, participatory, historically informed—that are required to forge a pathway from the present U.S. educational landscape to a freer tomorrow. The authors use speculative approaches to teacher education and student learning to intentionally design beyond the boundaries of traditional research and practitioner resources that seek to “fix” current schooling conditions. Building from visionary organizing and artistic traditions that have captured the popular imagination, this volume suggests new forms of engagement for diverse learners. It pragmatically explores how to work toward radical new spaces of possibility for learning and teaching. Chapters include a range of learning contexts, from problem solving in complex video game settings to innovative world-building alongside young people in schools and communities. Readers will be inspired to completely rethink what is possible when it comes to justice-oriented, culturally responsive education. Book Features: A collection of over 40 contributors explore speculative education across a range of research settings. Examples of digital learning that include videogames and online collaboration. Multiple chapters that feature co-authored research and innovation with students and teachers. Innovative design and pedagogical strategies, including a chapter re-writing policy documents based on speculative imagination. Designing Effective Writing Prompts for English|x|Seminar paper from the year 2010 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1.7, Southern Illinois University Carbondale (Southern Illinois University at Carbondale - English Department), course: English Composition Pedagogy and Practice, language: English, abstract: A teacher has to create a work-friendly environment that engages students to

participate in and become a part of the classroom activities. Since I have had some teaching experience, I know that this is the most daunting task the teacher is confronted with. Furthermore, this is a task the teacher has to fulfill every day anew. No lesson is the same, and today your class can be totally different than the day before. Students' attitude and participation in the classroom can fall from astonishing to frustrating within moments. To be aware of the classroom vibe is most crucial to teaching success. Standing in front of the classroom, the teacher has to be able to adapt to the students' condition, to engage with them and to arouse their interest; in short, the teacher has to be aware of his or her audience. As a teacher, you need to be able to open a communicative channel that allows you to convey your message adequately and at the same time reach your students. Both speaker and recipient have to feel comfortable with the channel and must be interested to keep this channel open. When this communicative approach becomes one-sided, the teaching will fail; either the teacher will not be able to perform in a comfortable way, or the students might not be willing to receive. This can be avoided if both sides cooperate with each other by "make[ing] your conversational contribution such as is required, at the stage at which it occurs, by the accepted purpose or direction of the talk exchange in which you are engaged" (Grice 24). Grice talks about five maxims of conversation that need to be respected to provide a fertile ground for conversation.

Dream Writing Assignments Creative questions elicit creative responses. That's what English teacher David LeCount demonstrates in this collection of quirky, provocative writing prompts designed to release students from standardized writing assignments. More than 600 prompts serve as multidisciplinary opportunities for students to write creatively. Dream Writing Assignments can be used in two ways: as a practical, flexible, and handy resource for teachers who are looking for creative topics to assign, and as a stimulating student text. The prompts encourage students to research, reflect, and explore; engage in wordplay; and experience writing as a form of discovery and delight. Think of the results if you should invite your students to answer the following questions: How are violence and intelligence related? What is your idea of the perfect experience of beauty or happiness? If greed is an addiction, how can it be cured? More than a list of topics, Dream Writing Assignments includes student writing samples, plus principles and examples of masterpieces of Asian literature woven throughout the prompts. Haiku is a favorite of American teachers, and LeCount uses his expertise in this short verse form to offer some examples for the curious to try their hand or refresh their thinking. Use the prompts so students can discover their own voices. Shake them from their daily, routine minds and awaken them to a world where their imaginations can roam.

Sarah, Plain and Tall Reader Response Writing Prompts|x|Young adults are

actively looking for anything that connects them with the changes happening in their lives, and the books discussed throughout *Literature for Young Adults* have the potential to make that connection and motivate them to read. It explores a great variety of works, genres, and formats, but it places special emphasis on contemporary works whose nontraditional themes, protagonists, and literary conventions make them well suited to young adult readers. It also looks at the ways in which contemporary readers access and share the works they're reading, and it shows teachers ways to incorporate nontraditional ways of accessing and sharing books throughout their literature programs. In addition to traditional genre chapters, *Literature for Young Adults* includes chapters on literary nonfiction; poetry, short stories, and drama; cover art, picture books, illustrated literature, and graphic novels; and film. It recognizes that, while films can be used to complement print literature, they are also a literacy format in their own right--and one that young adults are particularly familiar and comfortable with. The book's discussion of literary language--including traditional elements as well as metafictional terms--enables readers to share in a literary conversation with their students (and others) when communicating about books. It will help readers teach young adults the language they need to articulate their responses to the books they are reading.

A great deal of research related to assessment is focused on ‘the testing industry’, high-stakes language proficiency testing, and related analytical and statistical reports that are far removed from teachers’ and students’ experiences in the classroom. Recently, more attention has been paid to assessment in language classrooms and the many challenges that teachers face in both measuring and promoting student learning. This book contributes to the body of knowledge related to teacher assessment competence, and how it is manifested in the decisions they make about assessment procedures and instruments in their classes. Focused on specific challenges related to classroom assessment, each chapter reports on particular assessment issues faced by teachers, their choices regarding such issues, and the consequences (actual or anticipated) of their decision-making. This book will interest the thousands of teachers globally dealing with the numerous challenges associated with effective classroom assessment in language learning. This collection of teacher voices, stories, and investigations provides possible solutions to such challenges, and will serve to promote assessment literacy in the language teaching profession. Embark on a compelling narrative that chronicles the experiences of Laura and Joan, students participating in a field trip to the Delta del Ebre, responding to a collaborative initiative spearheaded by the Center for Climate Change (C3) at the Universitat Rovira i Virgili (URV). This narrative is shaped by the surf-centric climate services thesis of Dr. Anna Boqué, emphasizing the seamless integration of academic research into pragmatic climate mitigation measures. Notably, the realization of this initiative is indebted to the steadfast support of the Department of Research and Universities of the Generalitat de Catalunya. Laura and Joan, guided by insights from the URV's Climate Change Research Center, engage in data analysis and strategic formulation of climate crisis interventions, exemplifying the transformative potential of interdisciplinary collaboration. This story, available in both Catalan and English, forms an integral part of a collection disseminated to educational institutions and libraries. The accompanying website offers a didactic guide and a diverse array of materials for a thorough exploration, underscoring the intersection of academic research, climate services, and community-driven initiatives. Join us in acknowledging the catalyzing impact of collaboration and recognizing the pivotal role played by the Generalitat de Catalunya in empowering students to contribute meaningfully to a resilient and sustainable future. We acknowledge Carlos Lozano, Montse Español, Xavier Gómez-Cacho, and Jordi Sales for their contribution to this work.

. New Theatre Quarterly. New Theatre Quarterly. Closing Joan's Book: Some Personal Footnotes. For many, the death of Joan Littlewood on 20 September 2002 at the age of 87 marked the end of a theatrical era – though in practice she had lived an increasingly reclusive life following her move to France and the death of her partner Gerry Raffles in 1975, interrupted only in 1994 by the publication of an autobiography, *Joan's Book*. Clive Barker, Co-Editor of NTQ, became a member of Littlewood's Theatre Workshop company in 1955, shortly after the change from a touring policy to a building-based company at the Theatre Royal, Stratford, had led to the departure of Ewan MacColl and others of the original group, and subsequently to the displacement of other members as critical success led to West End transfers. What follows is not a dutiful obituary but a highly personal memoir of the years that followed, and provides an ironic contrast between Joan's own published recollections and the experience of one of her 'slags' – liable to be called on to do anything and everything. Joan's own recollection of Clive Barker was that 'You could only do three things. Catatonics, menace, and I forget what the third was.' Here, with fearful glances over his shoulder for an apparition at the window, Clive Barker reminds her, and adds a few other corrigenda to *Joan's Book*.

Here we present a hypothesis that describes where junk DNA comes from in a pursuit of forming a well-established scientific theory. We suppose that junk DNA is added to our genomes by practical organisms via history (DNA fragments). The hypothesis is based on a number of facts such as oncoviruses and tumour-causing bacteria. A set of experiments that aims to test our hypothesis is proposed as well. In addition to our main pursuit, we aspire to form a protocol that aims at discovering the "evolutional age" of various species.

PROPYLENE GLYCOL SOLUTION FOR HUMIDORS

Can I use propylene glycol in my humidor? Propylene glycol needs to be mixed with distilled water in order to provide the correct relative humidity to properly store and age your cigars. Beyond relative humidity, a PG solution for humidors also works to prevent mold and bacteria growth in your humidor and on your cigars.

How do you use PG solution in a humidor? Fill the humidification unit with propylene glycol solution (also called 50/50 solution). With a standard foam humidification unit, you can either squirt the solution into the unit, or you can submerge the entire unit in a dish filled with propylene glycol.

What solution do you use in a humidor? Use Distilled Water or Propylene Glycol Solution Tap water contains microscopic bacteria which can lead to mold and ruin your cigars and your humidor. Get a gallon of distilled water from the grocery store, or use propylene glycol solution (also called 50/50 solution).

How to season a humidor with propylene glycol?

What can I put in my humidor to keep cigars fresh? Thankfully, the answer is straightforward: use Boveda packs wherever you store cigars. But what is a Boveda pack? Boveda is a proprietary blend of all-natural water and salts, specially designed and patented to maintain a consistently accurate relative humidity (RH) inside your humidor.

What can I use instead of distilled water in my humidor?

How often do you add solution to humidor? Only as often as necessary. Once your hygrometer dips below 65%, you should add more distilled water. (The “normal” range is 65% – 70% RH.) Of course, how often you need to refill also depends on both, your cigar humidor itself, and the type of humidifier you have in it.

Should I wipe down my humidor with distilled water? Fill the container about halfway with distilled water and place it inside the humidor. Close the top of the humidor, and leave alone for a day. Do not wipe down the cedar lining with distilled water, as this could shock the wood and lead to warping, which affects the humidor's seal.

Do I need a humidor solution? If you only use distilled water, then you are not going to be able to maintain the humidity levels properly, and your cigars will suffer for it. Instead, you should use a solution with both distilled water and propylene glycol like our Cigar Humidor Activator Solution.

What liquid do you put in a humidor? Distilled water and propylene glycol (also called 50/50 solution) are best for your humidor because they are free of the harmful bacteria and impurities that create mold. You can pick up a gallon of distilled water at the supermarket or convenience store for around a dollar or two.

How long does it take for a humidor to reach 70? In general, it can take anywhere from 24 hours to 72 hours for a new humidor to reach 70% humidity level after setting up the humidifier and adding distilled water or humidor solution.

How to break in a new humidor? Fill a plastic cup or dish with water and place it inside the humidor. Check the humidity inside the humidor in 24 hours. Slowly but surely the humidifier will emit moisture into the humidor for slow, proper seasoning. Do not add any cigars to your new humidor until the relative humidity reaches 65% to 70%.

What is the fastest way to season a humidor? Remove your cigars from your humidor and move them into a closed Tupperware® container, cooler or a Humidor Bag with 69% Boveda. Place the 84% Boveda seasoning pack(s) inside your empty wooden humidor. Close the lid and don't open the humidor for 14

days—no matter what your hygrometer readings are.

Do I need to season my humidor if I use Boveda packs? Yes, if a wineador has wood trays and shelves, you should season the unit before adding cigars. Seasoning conditions the wood components inside the wineador. Remove the clear plastic overwrap before using. Do NOT open the humidity packet inside.

Should I unwrap cigars in the humidor?

What can I use for humidity in my humidor? We recommend you use 2-way humidification Boveda packs. If you're wondering how to maintain humidity, Boveda is the best way to keep your humidor at 70.

What is the relative humidity of propylene glycol? Our proprietary propylene glycol blend maintains a steady 70% RH relative humidity, meaning that your cigars stay in perfect condition without drying out or getting too moist. Make sure that you get the best out of your collection by using our best in class humidor solution!

Can you use propylene glycol for diffuser? Reed diffuser bases come in a variety of types, including alcohols and other solvents such as propylene glycol, vegetable glycerin, and polysorbate. Alcohol is the most common base used and produces a strong scent, while other solvents are often added to help dilute the alcohol and produce a milder, more subtle scent.

How to make humidor liquid? It's called 50/50 which is made up of a 50% solution of Propylene Glycol and 50% Distilled Water. The PG allows the water to evaporate at a 70%RH rate which is recommended for a desktop humidor.

The Psychedelic Explorers: Unlocking the Mysteries of the Mind

What are Psychedelics?

Psychedelics are a class of substances that induce profound alterations in consciousness, perception, and mood.
