Trumpet Pedagogy: A Q&A with David Hickman

Q: What is your philosophy on trumpet teaching?

A: My philosophy is based on the belief that every student has the potential to reach their musical goals. I focus on developing each student's individual strengths and helping them overcome their challenges. I believe in creating a positive and supportive learning environment where students can feel comfortable taking risks and exploring their musicality.

Q: What are the most important elements of trumpet playing?

A: There are many important elements of trumpet playing, but some of the most fundamental include:

- **Embouchure:** The embouchure is the way in which the lips are positioned on the mouthpiece. It is essential for producing a clear, rich sound.
- **Airflow:** The airflow is the amount of air that is directed through the instrument. It is crucial for controlling the volume and pitch of the sound.
- **Fingering:** The fingering is the way in which the valves are pressed to change the pitch of the sound. It is essential for playing melodies and chords.

Q: How do you help students develop their embouchure?

A: I start by helping students understand the anatomy of the embouchure and how it affects the sound of the trumpet. I then guide them through a series of exercises that strengthen the embouchure muscles and improve their flexibility. I also emphasize the importance of practicing with a mirror so that students can see their own embouchure and make adjustments as needed.

Q: What are some common challenges that trumpet players face?

A: Some of the common challenges that trumpet players face include:

- **Lipping:** Lipping is a technique used to produce a clear, high-pitched sound. It can be difficult to master, but it is essential for playing many types of music.
- **Tonguing:** Tonguing is a technique used to articulate notes. It can be tricky to get the timing and accuracy of the tongue movements just right.
- **Endurance:** Playing the trumpet requires a great deal of endurance. I help students develop their endurance by gradually increasing the amount of time they practice and by incorporating endurance-building exercises into their practice routine.

Q: What is the most important thing you want your students to learn from your teaching?

A: The most important thing I want my students to learn is how to love playing the trumpet. I want them to experience the joy and satisfaction that comes from making music. I also want them to develop a strong work ethic and to always strive to reach their full potential.

The Roman Cult of Mithras Mysteries: Unraveling the Secrets

What were the Mithras Mysteries?

The Mithras Mysteries were a secret religious cult that flourished in the Roman Empire from the 1st to the 4th centuries CE. Followers of Mithras, the Persian god of light, met in underground temples or sanctuaries known as mithraea. These subterranean chambers were often decorated with elaborate frescoes and sculptures depicting the life and adventures of Mithras.

Who were the Members of the Mithras Cult?

The Mithraic cult was primarily composed of Roman soldiers. Its popularity was likely due to the god's association with strength, courage, and loyalty, traits highly valued in the military. Additionally, Mithras was often depicted slaying a bull, symbolizing the triumph of good over evil, a theme that resonated with Roman legionaries.

What were the Beliefs and Practices of the Mithras Cult?

The Mithras Mysteries were characterized by a strict hierarchy of seven degrees of initiation. Each degree represented a different stage in the spiritual journey of the cult's followers. The cult also practiced a ritual meal, known as the "Supper of Mithras," which symbolized the shared experience of initiation and brotherhood.

How did the Mithras Cult Influence Christianity?

Scholars have noted striking similarities between the Mithras Mysteries and early Christianity. Both religions emphasized the importance of a savior figure (Mithras for the Mithraists, Jesus Christ for the Christians), had a hierarchical structure, and practiced rituals such as baptism and communion. Some scholars believe that the Mithras cult may have influenced the development of certain Christian beliefs and practices.

Why did the Mithras Cult Decline?

The Mithras Mysteries declined in the 4th century CE, likely due to the rise of Christianity and the persecution of pagan cults. By the end of the 5th century, the Mithraic cult had largely disappeared from the Roman Empire. However, its influence can still be seen in art and literature, and its legacy continues to fascinate scholars and historians today.
